

WEBCON BPS 2021 R3

history of changes for version 2021.1.3.178

Before upgrading WEBCON BPS

- 1 Make sure that WEBCON BPS licenses are up to date. It is recommended to refresh licenses before upgrading the system to avoid any unnecessary downtime.
- 1 If the changelog contains a section titled "Changes to existing features", please verify whether the changes will impact your implemented system in any way.

Changes to existing features

[Modern form]

- 1 The screen scrolling behavior in OCR verification preview has been restored from version 2021.1.2.

New features

[Actions]

- 1 A new global parameter has been added to the configuration database: ImportValidateAppProcPresUniqueness. When importing an application between different content databases, it is responsible for checking whether processes with the same GUIDs are imported. By default this mechanism is turned on.

Bug fixes

[General]

- 1 Improved the efficiency of AD synchronization.
- 1 Fixed a bug on the Classic form which caused the error message to be displayed incorrectly.
- 1 Fixed a bug that allowed the user license limit to be exceeded for Designer Desk.
- 1 Fixed an OAuth2 authentication error when selecting "Application" (App) type.

[Portal]

- 1 Fixed an issue which prevented from finding the user in the configuration of the application with API access.
- 1 Fixed a display error of the bar containing the search field.
- 1 Fixed an error caused by creating a Webcon Apps subscription with the word "designer" in its name.
- 1 Fixed a Dashboard bug with displaying empty places of start buttons of companies to which the user has no access.
- 1 Fixed a bug which caused an error message to appear when changing a set value of a column on the item list.

[Modern form]

- 1 Fixed a bug which caused the lack of option to set a column on an item list as a technical column.
- 1 Fixed a bug in the item list related to setting fields based on the data imported from an Excel file.
- 1 Fixed a display error of the horizontal form fields layout in a group on an archived workflow instance.

- 1 Fixed bug concerning an incorrect configuration of the rule when adding validation on path.
- 1 Fixed a bug in the item list where the picker column with a user's data source did not set dependent fields correctly.

[Designer Studio]

- 1 Fixed a "Sequence contains no elements" error appearing when adding a form rule related to an item list.
- 1 Fixed a bug that allowed SharePoint form selection in Designer Studio installed in standalone mode.
- 1 Fixed an error which prevented saving a business rule in which the "Select values" function was used.
- 1 Fixed an issue where additional BPS data source columns were not displayed for picker form fields when using a test query.

[Form fields]

- 1 Fixed a bug in the picker field of the item list in single-row editing mode, which caused the value not to be displayed when using a filter.

[Actions]

- 1 Fixed a bug in substitutions handling when the account in the AD of the replaced person has been deleted and it's missing in the CacheOrganizationStructure.
- 1 Fixed an issue which caused an external user to be removed from the BPS User list after being added to a group using an action.
- 1 Fixed a bug in the "Add SP privileges" action which caused that privileges were added only for one of several users selected with a form field.

[Plugins]

- 1 Fixed a bug in the Outlook Add-In which caused that searching for choice field

values when mapping form fields didn't work.

[Web Part]

- 1 Fixed an error that appeared after saving a report to which a filter based on "Choice field" or "Person or group" form fields was added, if the "Allow multiple values" option was selected in their configuration.

[Service]

- 1 Fixed a service error that caused problems with the operation of HotMailBoxes and HotFolders.
- 1 Fixed a bug in the "Archive workflow instances" action, which caused the archived fields which were in non-expandable groups to not be displayed.

[Designer Desk]

- 1 Fixed a bug which caused the lack of fronton license to prevent from entering the Designer Desk.
- 1 Information about the necessity to have a license for Designer Desk has been added.
