

WEBCON BPS 2020.1

history of changes for version 2020.1.3.503

Before upgrading WEBCON BPS

- 1 Make sure that WEBCON BPS licenses are up to date. It is recommended to refresh licenses before upgrading the system to avoid any unnecessary downtime.
- 1 If the changelog contains a section titled "Changes to existing features", please verify whether the changes will impact your implemented system in any way.

Bug fixes

[Portal]

- 1 Fixed an error caused by the "null" value on AttBool report columns.
- 1 Fixed a display error of "My tasks" in the WEBCON BPS Portal on the Internet Explorer browser.

[Modern form]

- 1 Fixed the display of the SQL Grid form field.
- 1 Fixed an error which prevented the OCR mechanism from reading a text field placed under a field in "Read only" mode.

[Designer Studio]

- 1 Fixed a bug which caused translations from e-mail notifications template not to copy, when a template in a process was created.

[Actions]

- 1 Fixed a bug occurring on the classic form when adding a value not present in the data source of the choice field.
- 1 Fixed an Import-Export mechanism bug which occurred when exporting a process package with a process which was linked to other processes.
- 1 Fixed an issue with the 'Invoke SOAP Web service' action. Item nodes will not be created for 'byte array' data in the configuration.
