WEBCON BPS 2020.1

history of changes for version 2020.1.3.371

Before upgrading WEBCON BPS

- Make sure that WEBCON BPS licenses are up to date. It is recommended to refresh licenses before upgrading the system to avoid any unnecessary downtime.

- If the changelog contains a section titled "Changes to existing features", please verify whether the changes will impact your implemented system in any way.

Bug fixes

[General]

- Fixed a migration error which occurred when migrating actions which had a special character in their configuration.

- Fixed an error which in some cases caused an interruption of the indexation.

- Fixed an error of user synchronization in two domains with a one-way trust.

- The fields storing information about the user who modified the row were extended.

- Fixed the MailApproval configuration for Cloud installation.

ı AAD users synchronization was improved.

ı Improved logging in via UPN.

ı Fixed an error which caused displaying a "Array dimensions are outside of the supported range." message.

[Portal]

ı Improved entering search phrases on the report.

ı Improved security used after blocking a domain account.

ı Fixed an error which caused the option to download Designer Studio not to appear in Portal.

[Modern form]

ı Fixed the display of the form field preview in processes configured as "Classic on BPS Portal" and "Classic on SharePoint".

ı Fixed the font display in the data table.

ı Fixed using a quick path when a comment is required.

[Actions]

ı Fixed an "Update a Word file" action error which caused the "Handwritten signature" form field not to be updated.

ı Mapping of the responses returned by REST API to the form fields had been improved.

ı Fixed the display of the BPS Groups tab for different installation types.

ı Fixed a Generate/Update Word file action error which occurred when the content used data from the SQL Select form field which was feeded by BPS Internal view.

- Fixed an issue with relative redirection for quick paths in the view mode.

- Improved the support for adding an attachment to a nested location for the "Add an attachment to the list" action.

[Data sources]

- Fixed a bug of the recursion limit for the BPS Users data source.
