

# WEBCON BPS 2020.1

## history of changes for version 2020.1.2.163

### Before upgrading WEBCON BPS

- 1 Make sure that WEBCON BPS licenses are up to date. It is recommended to refresh licenses before upgrading the system to avoid any unnecessary downtime.
- 1 If the changelog contains a section titled "Changes to existing features", please verify whether the changes will impact your implemented system in any way.

### Bug fixes

#### [General]

- 1 Improved performance when downloading data from SharePoint during single user synchronization.
- 1 When configuring an existing SQL account to use in Portal, a message would sometimes appear informing the user that their password is incorrect. This was an erroneous message and the issue has been resolved.
- 1 Fixed an error occurring during migration caused by a lack of procedures.

#### [Portal]

- 1 Fixed an error causing a checkout message to appear when editing a workflow element.

### **[Modern form]**

- 1 Fixed an issue with some elements of the form displaying incorrectly when using the dark theme.
- 1 Fixed an error in displaying translations in tile tooltips.
- 1 Fixed an error in coloring new tasks on the form.

### **[Processes]**

- 1 Fixed an issue with the Import-Export mechanism which caused global business rules parameters to disappear.
- 1 Fixed an issue with Import-Export mechanism which was caused by view configuration on the dashboard.
- 1 Fixed an issue with the absence process wizard where it would sometimes fail to update the configuration in the XML file.

### **[Form fields]**

- 1 Improved how the date control is displayed on reports.
- 1 Fixed an error that caused 'Data row' form fields to not update correctly after changing its value.

### **[Actions]**

- 1 Fixed an issue with the validation of the mass action.
