

# WEBCON BPS 2020.1

## history of changes for version 2020.1.3.494

### Before upgrading WEBCON BPS

- 1 Make sure that WEBCON BPS licenses are up to date. It is recommended to refresh licenses before upgrading the system to avoid any unnecessary downtime.
- 1 If the changelog contains a section titled "Changes to existing features", please verify whether the changes will impact your implemented system in any way.

### Bug fixes

#### [Portal]

- 1 Fixed a bug related to searching among choice fields on the reports.
- 1 Fixed an error of triggering mass actions if the report on which they are located was embedded on the dashboard.

#### [Designer Studio]

- 1 Fixed an error caused by a lack of TLS 1.2 support by Designer Studio.
- 1 Fixed a bug with adding an attachment on an item list in the mobile application.

#### [Actions]

- 1 Fixed a bug causing a problem with correct handling of Response-Body in standard REST actions.
  
- 1 Fixed a bug which occurred on the path additional validation, if it used a business rule.
